

Access Security Integrator

Access Security Integrator sets a new standard for enterprise-level, integrated access control systems. With ASI, you get 5 systems in 1 with customer-driven features that make managing your facility effortless and one that you can count on. Access Security Integrator supports the IC-1600 and UP-2000 hardware lines for flexibility in designing systems of all sizes. Exceptional, custom reporting provides a complete audit trail of all activity.

Standard Features Included with Every System

► BUILDING CONTROL AND AUTOMATION

Schedule specific doors to unlock and re-lock, control lights and other user-definable outputs, monitor for motion and more.

► ADVANCED ALARM MONITORING AND MANAGEMENT

Any exception to the normal rules of access may be flagged as alarms, routed to specific users and tied into graphical maps for instant management.

► INTEGRATED PHOTO ID AND BADGE-CREATION

Capture photos and create professional badges for added security for your facility. Supports all major card printer manufacturers.

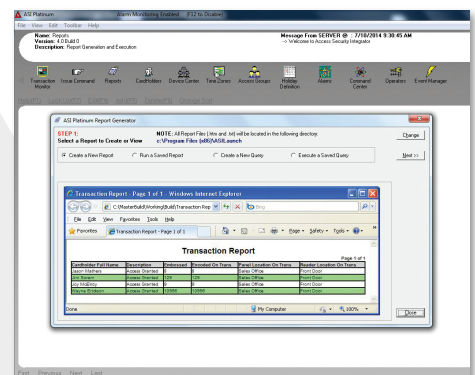

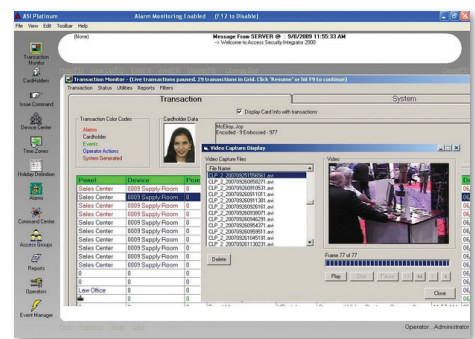

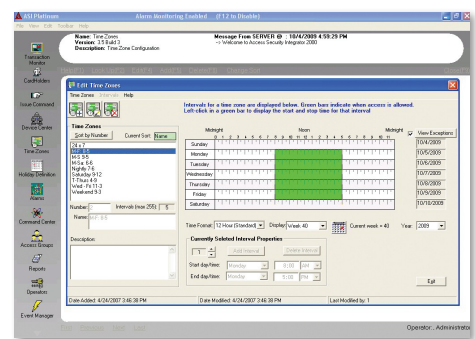

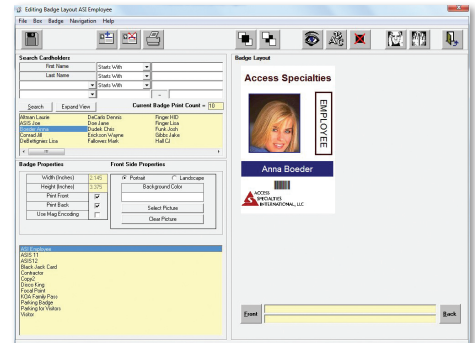

► EVENT MANAGEMENT

Virtually any event may be defined (such as a specific group or card holder at a critical location) to trigger multiple responses (such as send an Email, activate alarm point or other user-definable output).

► ACCESS CONTROL BY ZONES

Effortlessly manage who goes where and when for a single location or for multiple locations by partitioning the database and through the use of colorful graphics to help instantly convey essential information.

A FEATURE-RICH, INTEGRATED ACCESS SECURITY MANAGEMENT SYSTEM

Manufacturing Access Control Systems for Over 25 Years
